VIPedge™

Toshiba's Cloud-Based Telephone Solution

Get the Edge in Unified Communications

Toshiba's VIPedge cloud-based business telephone solution is designed for organizations needing robust communication features without having to own and maintain an onsite telephone system. Let Toshiba manage your system; all you have to do is answer your phone calls utilizing all the unified communication applications your business needs.

A Cloud Solution Like No Other

- Backed by Toshiba's industry-leading quality and reliability
- Designed and implemented by a nationwide network of authorized Dealers and certified service specialists to meet your specific business needs

Comprehensive Capabilities at Your Fingertips

- Complete business telephone system features
- Voicemail with unified messaging
- Call Manager unified communications with presence, Toshiba endpoint call control from your PC and Instant Messaging (IM)
- Mobility solutions including find-me follow-me call routing
- And much more

All the Advantages without Having to Purchase a Telephone System

The VIPedge cloud-based business telephone solution provides industry-leading, feature-rich functionality based upon the on-premise Toshiba IPedge business telephone system architecture.

VIPedge supports many of the same high-quality Toshiba endpoint devices as the IPedge, including Toshiba's IP5000-series desk telephones and IP4100-series wireless telephones.

VIPedge offers an alternative to buying a telephone system. Customers pay a monthly service fee, based upon size and usage, instead of purchasing or leasing a telephone system.

Advantages of Toshiba Cloud Unified Communications

VIPedge Solution vs On-Premise System

This powerful yet simple, worry-free, and future proof telephone solution enables businesses to:

- Reduce capital expenditure to purchase equipment
- Budget telecommunication costs with fixed monthly fees
- Eliminate costly software upgrades
- Facility space savings by reducing on-site telephone system equipment requirements
- Eliminate the costs of system management
- Easily expand VIPedge and support the number of users, locations, and applications required
- Survivability is automatically provided via the Cloud

Toshiba's Power of Choice

Toshiba gives you all of the advanced telecommunication capabilities you need, delivered either as a monthly cloud service, or as a complete on-premise IPedge system purchase. You get similar capabilities regardless of which delivery method you choose.

Best of all, if your needs change, businesses who start with the VIPedge service can easily migrate to their own on-premise IPedge system in the future. This enables businesses to retain their investment in Toshiba telephones and to benefit from the same familiar features.

Features and Pricing Options Designed For a Business Like Yours

VIPedge comes in a package that has everything you need, including the entire suite of telephone features, plus voicemail with unified messaging, find-me follow-me call routing, soft phone, and the Call Manager UC application to make call control from your PC, presence and Instant Messaging easy and efficient.

- It's a comprehensive solution ideal for most business environments, and a great value without the headaches or costs of owning your own telephone system
- Personalize endpoints to meet the needs of each individual user

It's Easy to Get Started

The VIPedge cloud-based business telephone solution is available through Toshiba's nationwide network of Authorized Dealers. If you would like more information or a price quote, we'd love to hear from you.
