

Cloud PBX & VoIP

Businesses today need technology solutions that help improve communications, while driving productivity across the enterprise. They also want a reliable, high quality phone system that simply works. And with your business in a constant state of change, you need a solution that's both easy to learn, and easy to use.

Today, transforming your phone system is simple and cost effective, regardless of your business—whether you have five employees or fifty. Our platform adapts and adjusts to your needs, seamlessly working the way you need it to. That way, you can focus on your business, not your communications system.

With ACC, you'll get a platform that:

- Provides high quality, reliable cloud based solutions
- Utilizes modern features with enterprise capabilities
- Costs less up front and over time vs. traditional premise-based phone systems
- Future proofs your communications system

You'll be able to leverage powerful features and benefits including:

- The flexibility to scale up or down as your needs change
- An effective, intuitive user interface
- Leading application integration - Salesforce.com, Microsoft Outlook, etc.
- Total control, right from your fingertips (through desktop browsers and mobile devices)
- Limitless call routing features for optimal productivity

What is Cloud PBX & VoIP?

Cloud PBX (Private Branch Exchange) is the modern version of the traditional telephone closet. The new cloud model puts the brains of your phone closet into professionally maintained data centers, helping businesses transform their communications and improve productivity—without the need to purchase expensive, complex, depreciating phone system software and hardware. Additionally, ACC Telecom will manage and monitor your system 24x7, allowing you to focus on work.

VoIP refers to phone services that are accessible through a high quality broadband connection and is typically more cost effective and scalable than traditional alternatives. With both Cloud PBX and VoIP, you and your team can work from the office, home, on the road, or through your smartphone, all while utilizing your company's communications solution to help maintain and uplift your image and brand.

Cloud PBX Features

With ACC Telecom, we give you the tools and features you need to enhance your business for improved growth and success. Utilize countless options to take your business to the next level with a wide variety of services from Cloud PBX to Enhanced SIP Trunking.

Unified Communications (UC), which is the cornerstone of our Cloud PBX solution, is the seamless integration of voice, data, applications, and other technologies that help dramatically improve your communication processes and business productivity.
