

# ACC Cloud Surveillance Systems

Businesses today demand security solutions that provide remote viewing and control anywhere at any time on any device. They also want a reliable, high quality security camera system that is simple to use. And with your business in a constant state of change, you need a solution that's both scalable and affordable.

With ACC's cloud surveillance solution, you will have complete peace of mind rather than fearing the constant uncertainty of internal and external threats. With features such as 24/7 live remote viewing, smart infrared (IR) technology, facial recognition, and motion detection with real-time alerts, you can rest assure that your business is safe even when you are away from the office.

## ACC Telecom's Cloud Surveillance Camera Solution includes:
